Why LCM Ultra System

01

Built for Medium-Duty Trucks

A necessary addition to any shop that services 1/2 Ton, 3/4 Ton, 1 Ton, and larger trucks. Converts your standard wheel balancer to accept wheels up to a 10 x 225mm Ford Wheel.

02

OEM-Recommended Spring-Loaded Studs

Specially designed spring-loaded studs ensure the LCM Ultra system never binds when installed onto a wheel, allowing a precise and repeatable balance every time. Recommended by most major truck manufacturers.

03

3 Proprietary Ultra Collets

Features 3 proprietary Ultra Collets for wheels with center bores between 4.5" and 6.7". Color-coded labels and a handy application chart expedite your service and prevent trial-and-error.

04

Works With Any Balancer

Designed to work with any wheel balancer with a 40mm shaft. Use with your existing wingnut or auto-clamping handle if your balancer is equipped with one.
